Attorney's Docket No.: 18511-008001

Amendment to the Specification:

Please replace the paragraph beginning at page 6, line 18 with the following amended paragraph:

--Figure 3 illustrates an example of a preferred embodiment of the mobile application security system 50 in accordance with the invention. In this preferred embodiment, a client/server type system (also known as a hub and spoke arrangement) may be used. However, other computer architectures and other configurations may also be used without departing from the scope of the invention. The system may include a server computer 52 and one or more host computers 54, such as Host 1, Host 2, Host 3, Host 4 and Host 5 and ~~Host N~~, that may be connected to the server computer by a computer network 56, such as a wide area network, the Internet, the World Wide Web, a telephone line and a modem or the like. The computer network permits the server and hosts to communicate data between each other. Each host may be a typical computer system that includes a CPU and a memory for executing a software application such as a mobile application.--
